Roller blinds PURE BOX 68 consist of a standard PURE roller blind and a 74 x 70 mm cassette that was designed and constructed by us. When developing our boxes we are focused exclusively on the look, firmness and easy mounting. Standard colours are white and grey, other RAL or NCS colours can be ordered for a surcharge. The standard feasible width of the boxes is 3 m, depending on the selected fabric.

*The max. height of blind could be limited, according to the type of fabric used*
